

EXPERIENCE

RECURSER – THE RECURSE CENTER, NEW YORK (AUGUST 2022- OCTOBER 2022)

- Currently undertaking a 12 week programming retreat at the Recurse Center working on self directed projects within an intentional community of curious programmers.
- Developing '[Sugartrail](#)', a Python-based network analysis tool for identifying suspicious businesses from Companies House data. Awarded the 'Most Impactful' project prize at Bellingcat's first ever hackathon.
- Developing '[NTS Scraper](#)', a Python-based tool for extracting metadata from NTS radio shows and visualising connections between shows via [network graphs](#) to aid music discovery.

FREELANCE DESIGN RESEARCHER (MAY 2022- AUGUST 2022)

- Researched non-profit funding models within the built environment for a recently incorporated Copenhagen-based philanthropic organisation that is part of IKEA.

RESEARCH FELLOW – STRELKA INSTITUTE, MOSCOW (FEBRUARY 2022)

- The Terraforming was a design research think tank at Strelka Institute directed by philosopher Benjamin H. Bratton and architect Nicolay Boyadjiev exploring the implications of geoengineering. 5-month fellowship ended prematurely following the Russian invasion of Ukraine.
- Research into global food systems was exhibited within the 6th Tallinn Architecture Biennale.

SOLUTIONS ENGINEER – SELDON, LONDON (MARCH 2021- FEBRUARY 2022)

- Seldon is a London-based start-up developing open-source software for deploying machine learning models to Kubernetes and managing them with reduced risk.
- Acted as the primary technical point of contact for clients throughout the pre-sales process. Provided architecture deep dives, built business cases, designed and delivered workshops, and presented on technical subject matter at international events including AI Summit, NYC and MLOps World, Toronto.
- Led Solutions Engineering for partnerships and strategic alliances globally, working closely with Seldon's VP of Alliances to grow our partner ecosystem.

MACHINE LEARNING RESEARCHER (OCTOBER 2020- FEBRUARY 2021)

- Co-authored a paper with researchers from Forensic Architecture entitled 'Detecting Tear Gas Canisters With Limited Training Data' published in WACV 2022.

DEEP LEARNING SOLUTIONS ENGINEER – IBM, LONDON (DECEMBER 2018- FEBRUARY 2021)

- Provided pre-sales technical support on IBM's deep learning software and GPU-accelerated POWER hardware platform.
- Led the development of computer vision prototypes built with Python, Node.js and TensorFlow, showcased at THINK London, Cog X, Smart Manufacturing Liverpool and IBM Festival of Innovation.

CREATIVE TECHNOLOGIST INTERN – IXDS (NOW PART OF PWC), BERLIN (MARCH 2018 – AUGUST 2018)

- Developed a toolkit of design research methods for a German automotive client.
- Integrated new features and debugged front-end prototypes for Europe's largest home appliance manufacturer prior to user-testing.

DESIGN RESEARCHER – BIODESIGN FOR SOCIAL IMPACT (NOVEMBER 2017- MARCH 2018)

- Created a futures research workshop exploring the creative potential of synthetic biology for Dutch Design Week 2017. The workshop was also delivered to students at Edinburgh College of Art (Biodesign Course) and Delft Technical University (Industrial Design Engineering Masters Program).

EDUCATION

MA DESIGN INFORMATICS – DISTINCTION

EDINBURGH COLLEGE OF ART & THE UNIVERSITY OF EDINBURGH (AUGUST 2016- JULY 2017)

BEng HONOURS MECHANICAL ENGINEERING – FIRST CLASS

THE UNIVERSITY OF EDINBURGH (AUGUST 2011- JULY 2015)

SQA ADVANCED HIGHERS – MATHS (A1), PHYSICS (A1), ART (A1) & MECHANICS (A1)

ROBERT GORDON'S COLLEGE (AUGUST 2010 – JUNE 2011)
